Stripping Tools
We are developing, producing and distributing an extensive range of stripping tools. This includes cable knives, wire strippers, dismantling and multi-functional tools. Our tools have been developed for accurate, fast and safe stripping of all common cable types. They carry the GS seal of TÜV Nord and were developed under the aspects of work safety. The tools are specifically tailored to the needs of professional users, are found in both, crafts and industrial use and are also suitable for domestic use.

Next to the WEICON TOOLS, WEICON produces special chemo-technical products for the industry. The product range of the company includes special adhesives and sealants, technical sprays as well as high performance assembly pastes and greases for all areas of industry - from the production, repair and maintenance to servicing.

The company headquarters are located in Münster, Germany. WEICON has subsidiaries in Dubai, Canada, Turkey, Romania, South Africa, Singapore and in the Czech Republic and is represented by WEICON partners in more than 100 countries all over the world.

From the beginnings to the present day

History

WEICON TOOLS

In 1967 an electrical engineer from Westphalia invented a cable stripper for stripping electrical cables. The inventor was looking for a sales channel for his knives and started a cooperation with Gerd Weidling, Managing Director of the company Weidling & Sohn; the current WEICON GmbH & Co. KG from Münster.

Launch at the Hannover Trade Fair 1967

The two managing directors took some hand samples of the knives to the Hannover Trade Fair to present them to trade visitors. With these individual pieces, both partners immediately managed to acquire orders for more than 3000 cable strippers during the course of the exhibition.

The tool manufacturer took over production and WEICON developed the global sales channels for the cable strippers during the subsequent period.

Impressive growth rates

Turnover grew continuously. Almost 4000 cable strippers were sold in 1967. In the next year, 1968, sales already reached more than 34,000 units. In the year 1969 the first wire stripper, No. 8., was added to the range and was sold more than 51,000 times straightaway. The sales figures grew continually in the following years and in 1987 the turnover reached more than 300,000 knives and 100,000 strippers per year.

The successful cooperation between the two companies lasted 20 years in total. In 1987 the patents for the knives expired and, as a result, replica products from Asia and Italy entered the market.

After expiry of the patents, the former partners went separate ways and WEICON started a cooperation in the tool sector with the company Franz Krampe from Ascheberg-Herbern, which still continues today. This cooperation is distinguished by innovations in the area of tool technology, has resulted in numerous patents and awards for the products and always allows new ideas and further developments to be incorporated in new tools.

WEICON TOOLS are now known throughout the world thanks to the good cooperation between WEICON and the company Krampe.

The range of tools now covers more than 25 different types of cable strippers, wire strippers and special tools, which provide a valuable service to users throughout the world in their daily work.
Scan your way to the video!
You will find QR codes on our product pages that lead directly to our tool application videos!
We have been working on the development and manufacture of our high quality stripping tools together with the company Krampe from Ascheberg-Herbern near Münster since 1990.

The Westphalian family business, managed by the second generation of the Krampe family, greatly values continuity, reliability and the highest quality.

The products are fully manufactured on-site, going against the trend of globalisation.

**Quality "Made in Germany"**

**WEICON and Krampe**

---

**Everything from a single source**

From the idea, initial drafts and drawings, sampling, tests and mould construction through to production, final assembly and quality testing - everything comes from one source.

“This is the only way we can guarantee the consistently high quality of our tools,” says company founder Franz Krampe. And he is supported by a team of highly qualified specialists.
"We are very pleased to have had a very reliable and innovative partner in the company Krampe for many years. We are planning to intensify our past cooperation in future to further strengthen and develop our market position," says Ralph Weidling, Managing Director of WEICON GmbH & Co. KG.

In 1990 we started the cooperation with wire stripper No. 5, which today still represents an important component of the constantly expanded product range of our WEICON TOOLS. Developments from the company Krampe are always up-to-date with the current status of technology and quickly track down trends that provide the decisive ideas for the design of new tools.
Cable Strippers

WEICON TOOLS Cable Strippers were developed for reliable, precise, safe and quick stripping of many different cable types.

The knives meet the maximum quality requirements and are suitable for use both in craft and industry.

Our Cable Strippers are registered under patent EU.Pat.no. 1117163 for the working range of 4 - 28 mm.
Cable Stripper S 4 - 28

- Completely ergonomic & fully insulated
- Progressive regulation and easy to operate adjusting wheel
- Precise, quick and safe stripping

The new generation of cable strippers made of high strength, fibreglass reinforced plastic. Safe to use and compact in design.

The Cable Stripper series S 4 - 28 allows precise, quick and safe stripping of all standard round cables with a diameter between 4 and 28 millimetres. The cutting depth of the blade can be progressively adjusted with the help of an adjusting wheel in the housing.

This prevents damage to the conductor inside. The cutting blade is integrated in the housing to rotate automatically and therefore allows an automatic changeover between circular and longitudinal cuts.

Our S 4 - 28 range is certainly something special. There are no other comparable tools on the market. The right Cable Stripper can be found for almost any application area due to the different types.

The tool lies perfectly in the hand due to the extraordinary shape. Furthermore, the retractable blade of the S 4 - 28 is a milestone in the area of safety at work.

Gerold Specking
Product Manager WEICON TOOLS
Cable Stripper
No. S 4 - 28

Safe due to retractable hook blade

• The blade can be locked in both positions

Cable Strippers

- Large handle diameter for optimum grip
- Progressive regulation and easy to operate adjusting screw
- Precise, quick and safe stripping
- Quick change of the inner blade with a bayonet fitting

Precise, quick and safe stripping of all standard round cables with 4 - 50 mm Ø. The Cable Stripper has an ergonomically shaped, anti-slip handle.

The cutting depth of the blade can be progressively adjusted with the help of a adjusting screw on the end of the handle. This prevents damage to the conductor inside. The cutting blade is integrated in the housing to rotate automatically and therefore allows an automatic changeover between circular and longitudinal cuts.

A protective cap is available for the cable stripper with blade, which engages securely onto the blade, thus substantially reducing the risk of injuries.

Wire Strippers

Automatic wire strippers for all common stranded and solid conductors.

A scanning system adjusts automatically to the respective wire diameter, and thus permits fast and simple dismantling and stripping.
Wire Stripper

No. 5

**Saves space by locking the wire stripper**

- Automatic wire stripper
- Precise work with adjustable length stop (5 - 12 mm)
- Integrated, well accessible side cutter up to 2 mm Ø

Stripping Tools

WEICON TOOLS stripping tools allow a range of different cables to be safely and conveniently stripped.

The flexible tools can even be reliably used in hard-to-reach areas and always provide precise results.
Quadro-Stripper

No. 16

Multifunctional with optimized cable routing

- Circular and longitudinal cutting - stripping - cutting
- Exchangeable hook blade, firmly locked in any position
- Anti-slip handle shape

<table>
<thead>
<tr>
<th>mm</th>
<th>Ø</th>
<th>mm²</th>

</tr>
</tbody>
</table>

No. 13 is particularly good in handling due to its design. The distinctive handle ensures that the tool lies safely in the hand and that you don’t slip off.

This makes every day work easier and also increases safety.

Stephan Krampe, Managing Director
Krampe GmbH & Co.KG
Stripping Tools

Coax-Stripper

No. 2

Good handling due to ergonomic design

- Two-level stripping of all common coaxial cables
- There is no need to adjust the cutting depth
- Also suitable for flexible cables
- Length scale (0 - 17 mm) integrated in the housing*

<table>
<thead>
<tr>

Electrical Installation Set

Set 1

• **Duo-Crimp No. 300**
• **Round Cable Stripper No. 13**

- Professional crimping of wire ends
- Two crimping ranges of 0.5 – 2.5 mm² and 4.0 – 6.0 mm²
- Meets the requirements of DIN 46228-21: 1992-02 concerning the withdrawal forces
- Side cutter for single wires of up to 6 mm²
- Stripping of 0.5 – 6.0 mm²
- Dismantling of all common round cables 8 – 13 mm
- Flush dismantling e.g. at junction and distribution boxes

Art.-No.
52881001

---

Set 2

• **Wire Stripper No. 5**
• **Cable Stripper No. S 4-28**

- Automatic wire stripper for 0.2 – 6.0 mm²
- Side cutter for single wires of up to 2 mm ø
- Adjustable length stop for defined distances at e.g. WAGO-Clamps
- Cable stripper with working range of 4 – 28 mm
- Adjustable cutting blade for round and longitudinal cutting
- Ideal for the construction of switchboards

Art.-No.
52881002
Electrical Installation Set

Set 3

• **Wire Stripper No. 5**
• **Coax-Stripper No. 2**

- Automatic wire stripper for 0.2 – 6.0 mm²
- Side cutter for single wires of up to 2 mm ø
- Adjustable length stop for defined distances at e.g. connection terminals
- Two-level stripping of all common coaxial cables
- Ideal for the installation of SAT systems with multi switches
- Length scale integrated in the housing e.g. for F-connectors
- Adjustment of cutting depth not necessary

**Art.-No.**
52881003

Electrical Installation Set

Set 4

• **Wire Stripper No. 5**
• **Round Cable Stripper No. 13**

- Automatic wire stripper for 0.2 – 6.0 mm²
- Side cutter for single wires of up to 2 mm ø
- Adjustable length stop for e.g. special distances
- Dismantling of all common round cables from 8 – 13 mm
- Flush dismantling e.g. at junction and distribution boxes

**Art.-No.**

Dismantling Tool
No. 25

For convenient longitudinal and circular cuts

- Safe work with the concealed blade
- Conductor protection with the curved blade tip
- Easy work, even at low temperatures
- Precise, durable and replaceable turnover blade

<table>

Cable Stripper
H.D. No. 1000

Working under voltage up to 1000 Volt*

Unit testing according to VDE regulation IEC 60900

- Quick cutting of multiple insulated cables
- Conductor protection with the curved blade tip
- Good transfer of force due to optimised handle shape

<table>

WEICON TOOLS cable overview

The cable types shown in this overview only serve as orientation with respect to the possible application areas of our tools. Of course WEICON TOOLS can also be used on similar cable types in many cases. Furthermore, the application suggestions depend on the material, application area and working range. Our tool recommendation is only a suggestion due to the various materials used by cable manufacturers.
